Biotechnology is the broad area of biology involving living systems and organisms to develop or make products, or "any technological application that uses biological systems, living organisms, or derivatives thereof, to make or modify products or processes for specific use" (UN Convention on Biological Diversity, Art. 2). Depending on the tools and applications, it often overlaps with the ...

Molecular medicine is a broad field, where physical, chemical, biological, bioinformatics and medical techniques are used to describe molecular structures and mechanisms, identify fundamental molecular and genetic errors of disease, and to develop molecular interventions to correct them. The molecular medicine perspective emphasizes cellular and molecular phenomena and interventions rather ...

Note: Eric Drexler's 1991 MIT dissertation, "Molecular Machinery and Manufacturing with Applications to Computation" [pdf, 30 MB], is now available online. The dissertation was written as a draft of Nanosystems, and contains most of the content of the book in nearly final form.. Update, Dec. 2012: The following table of contents and sample chapters are now available in a Ukrainian translation.
